today at (262) 679-1328

# THE ONLY TRUE MODULAR PROPANE DISPENSER ON THE MARKET

- Rugged, durable all-weather construction.
- Cashless payment system.
- Real-time Management and Tracking.
- The system can be sized to fit the available space and demand and vend up to the legal limit for co-located propane cylinder storage (72 to 84 cylinders).
- Only 14.25 inches deep so in many cases it can be installed in a store front while still maintaining ADA access requirements without alteration.
- Programmed and sized so that it meets ADA vending requirements as well.
- Two way communication to remotely take control of machine and monitor operations (additional cost).

## RUGGED, DURABLE, ALL-WEATHER CONSTRUCTION WITH CASHLESS PAYMENT SYSTEM

- This Solution provides the quickest and easiest way to exchange or purchase a full propane cylinder on the market, at a superior price point, and with the lowest operating costs.
- Proven to dramatically increase propane cylinder exchanges while eliminating employee involvement.
- Allows for 24 hours sales 365 days a year.
- Increases foot traffic to your store and can easily increase total store sales as a result.

**NOTE: Propane Vending Machines are producing 100% ROI (Return on Investment) within 6 to 18 months depending on the location.**

## PROPANE SHAX PRICING

- 3 module – 17 Compartment: \$13,500
- 4 module – 23 Compartment: \$15,500
- 5 module – 29 Compartment: \$18,950
- 6 module – 35 Compartment: \$22,450
- 7 module – 41 Compartment: \$23,950

# PROPANE SHAX FAQ'S

## HOW DO I KNOW WHAT COMPARTMENT MY PROPANE IS IN?

The door to that compartment will swing open and the door number will appear on the customer display.

## HOW DO THE MACHINES WORK?

You simply press "purchase" or Exchange on the customer interface and follow the prompts.

- swipe your card
- compartment door opens
- take out the bottle
- shut door (purchase)
- replace with an empty bottle (exchange)
- shut door

## WHAT HAPPENS IF I PRESS "EXCHANGE" BUT THEN DO NOT PUT AN EMPTY BACK IN?

The machine is designed to "see" that a bottle has been returned and if one is not or the door is not closed in the allotted time you will be charged for a "purchase"

## SEEMS LIKE A COMPLICATED SYSTEM....HOW OFTEN DO THEY BREAK DOWN.

Although the operating system is state of the art, all the hardware has been thoroughly tested in various outdoor operation in the oil and gas field and have proven to be very reliable. The only moving part in the system is the electromechanical locks. We rarely have issues. In over five years of operation in the extreme Texas weather and locations far north like Wisconsin and South Dakota we've experience no significant issues.

## HOW DO I GET A RECEIPT?

Email the address or text the number on the machine with the last four digits of the card you used and we will send the receipt back to you.

## DOES THE MACHINE TAKE CASH?

No. Since they are unattended, we opted not to have a cash option on the machine. We made the decision not to include a "bill acceptor" to preclude attempts to break into the machine to steal the cash.

However, for Propane Vending units, you can pay with cash inside the store. The bottle is paid for in the store and an attendant goes to the machine opens the master compartment, presses the "cash sale" button and the vend cycle is initiated and recorded as a cash sale on the POS system.

## WHAT ABOUT THEFT?

Each compartment is designed so that even if you cut out the compartment covering, the bottle will not fit through the frame. Each lock can withstand 600KG prying force and the fastest anyone has been able to bend the frame enough to remove a bottle (in testing) is 18 minutes.

## WHAT ABOUT FRAUD?

We have an EMV card reader and the machine can be set to only approve the same credit card a certain amount of times.

TO PLACE AN ORDER OR FOR ADDITIONAL QUESTIONS, PLEASE CONTACT US BY EMAIL AT [INFO@HRIVENDING.COM](mailto:INFO@HRIVENDING.COM), OR CALL OUR OFFICE AT (262) 679-1328.
